“Celebrating 55 Years of Excellence in Education”

MMPS/Circular/08/2023

Date:-28.04.2023

Dear Parents,

Greetings of the Day!

“Kindness is one thing you can’t give away. It always comes back”.

George Skolsky

The season of occurrence of Vector Borne Disease like Dengue, Chikungunya & Malaria in Delhi has started. These are all mosquito generated diseases and sometimes gain epidemic proportions if preventive measures are not taken. Prevention is the best method to control any disease. In order to control and prevent the outbreak of Dengue, Chikungunya & Malaria, it is essential to prevent breeding of mosquitoes. Therefore, we are sharing some awareness instructions. All students, parents & staff members are requested to make a note of below mentioned points:-

- To avoid mosquito bites wear full sleeve clothing and use mosquito repellants. Put wire mesh on windows to prevent entry of mosquitoes (if possible).
- Cover all water tanks and containers with well fitted lids to prevent breeding of mosquitoes.
- All overhead and other water tank /containers should be kept properly covered with lid and overflow pipe/air vent should be covered with wire mesh /cloth.
- All coolers should be scrubbed & cleaned once a week and mopped dry before refilling water.
- In coolers, that cannot be emptied, put one tablespoon of petrol /diesel.
- Don’t allow water to stagnate in and around houses.
- All unused containers, junk materials, tyres, coconut shells etc should be properly disposed off.
