Safety Hazards Associated With the Use of Banned Manjha

Dear Parents,

Greetings!

We wish to draw your attention to the serious safety hazards associated with the use of banned **manjha** (synthetic or glass-coated kite string). Despite government restrictions, such kite strings continue to be used and pose a significant threat to children, two-wheeler riders, pedestrians, and birds. Every year, these hazardous strings lead to serious injuries and, in some cases, loss of life.

In the interest of student and public safety, we request all parents to ensure that their children do not purchase or use banned manjha. If children participate in kite flying, they should use only cotton or other eco-friendly kite string and do so under the supervision of a responsible adult.

We also request you to:

- Educate your child about the dangers of banned manjha.
- Encourage the use of safe, eco-friendly cotton thread for kite flying.
- Supervise kite-flying activities and encourage safe practices.
- Discourage the purchase or use of synthetic or glass-coated kite strings.
- Teach children to protect birds and dispose of used kite strings responsibly.

Your support in creating awareness and promoting safe practices will help prevent accidents and protect both human life and wildlife.

Thank you for your continued support and cooperation.
