*“Celebrating 50 years of Excellence in Education”*

MMPS/Circular/01/2022

Dated :10.01.2022

Dear Parents,

In order to facilitate and ease the process of vaccination for our dear students, school has arranged the facility of FREE COVID-19 VACCINATION CAMP in school premises only. So, if your ward is between the age group of 15 to 18 / born in or before 2007, kindly bring him/her for vaccination in school uniform preferably on **11th January 2022 between 9 am to 1 pm along with his/her AADHAR CARD / 10<sup>th</sup> Passing Certificate and the registered phone.** Bring 1 passport size photograph if Aadhar card or 10<sup>th</sup> Certificate is not there.

## INSTRUCTIONS TO FOLLOW :

### During the appointment

**Stay safe.** Make sure to follow safety precautions at the vaccination centre such as physical distancing while waiting and wearing a mask.

**Communicate.** Let the health care professional know if you have any medical conditions that could be considered precautions.

**Keep your records.** You should receive a vaccination certificate that tells you which COVID-19 vaccine you received, when you received it and where you received it. Make sure to keep it saved if it is needed in the future.

### After you've been vaccinated

**Stay for monitoring.** The health care provider should observe you for about 15 minutes after the vaccine is administered to make sure you don't have any immediate reactions. However, it is extremely rare for severe health reactions.

**Be prepared for some side effects.** Vaccines are designed to give you immunity without the dangers of getting the disease. While it's normal to build immunity without side effects, it's also common to experience some mild-to-moderate side effects that go away within a few days on their own.

Some of the mild-to-moderate side effects you may experience after vaccination include: Arm soreness at the injection site, Mild fever, Fatigue, Headaches, Muscle or joint aches, Chills, Diarrhea.

If any symptoms continue for more than a few days or if you experience a more severe reaction, then contact your health care provider immediately.

**Be patient.** Building immunity takes time. You will be considered fully vaccinated approximately four weeks after your second dose of the COVID-19 vaccine.

**Keep yourself and others safe.** While these vaccines are showing to be highly effective at protecting people against serious illness from COVID-19, we're still learning about whether it is possible for a vaccinated person to still spread the virus, even without symptoms. Therefore, it is important to continue practicing safety precautions to protect yourself and others, including avoiding crowded spaces, physical distancing, hand washing and wearing a mask.
