Anti Fire Crackers Campaign

Dear Parents

Greetings!

With festivals around the corner, each one of us are gearing up for the festival – whether it is decorating our homes, shopping preparing sweets but we all must take a moment to think about fire crackers and whether they are really necessary? Have you ever given a thought to the hazardous and life threatening air pollution and deafening noise, emitted by firecrackers that can have adverse effects on you, your children and everyone around you. Doing away with firecrackers doesn't mean doing away with fun.

Use of fire crackers which release toxic pollutants like Sulphur Dioxide, Carbon Monoxide and many others which pollute the air and cause serious ailments like asthma, bronchitis, Hypertension and cardiovascular problems. The air and noise pollution caused by the fire crackers also affect the lives of animals, birds and other living beings on the earth. The ailing and the old persons are all the more prone to catch different allergies & diseases caused by pollution.

This festival season encourage your children to celebrate festivals responsibly.

Let's spread love and bring smiles on faces, and not contribute towards creating a harmful and destructive environment. Let's teach our children to be responsible citizens.

Wishing you all Happy, Prosperous and Safe Festivals
