MMPS/Circular/04/2019

Dated:-13.02.2019

Dear Parents,

School is doing its best in imparting discipline and life skills in students. Young children are vulnerable to adverse impacts of violent video games. Therefore, in pursuance to the advisory issued by Delhi Commission for Protection of Child Rights (DCPCR) as well as considering safety and security of the children, kindly note following:

Violent video games are available on iOS/Android Platform and Console Platform like PUBG, Fortnite, Grand Theft Auto Series, God of War, Hitman Series, Plague Inc and Pokemon. These games are causing harmful, negative and adverse impact on the brain of child. To safeguard children from such negative impact, look out for following signs and symptoms:

1. Becoming withdrawn from family and friends.
2. Persistent low mood and unhappiness.
3. Looking worried that stops him/her from carrying out routine tasks.
4. Sudden outbursts of anger.

Following indicative steps may be taken as a parent to safeguard the child:

1. Discuss the routine day with your child and look out for signs about any level of distress.
2. Monitor the child's activity and if the child is showing secretive behavior related to online activities.
3. If you fear that child is at risk, get professional help right away.
4. Remind the child that you are there and will support them as they face life challenges.

For the safety and security of the children, we request your whole hearted cooperation. Thanking you in anticipation.

PRINCIPAL
